FOR IMMEDIATE RELEASE

**Education Logistics (EDULOG) to Provide a  
Internet-Based School Transportation Management System  
to the Sto-Rox School District, PA**

**Missoula, MT – June 9, 2010** – Education Logistics, Inc. (EDULOG) announced today that it has contracted with the Sto-Rox School District of Pennsylvania for the implementation of the company's internet-based bus routing and scheduling system, a major part of EDULOG's suite of transportation management solutions for the K-12 school market. The agreement includes software licenses, related professional services, initial and continuing consulting services, and software hosting, maintenance, and support.

The Sto-Rox School District serves the borough of McKees Rocks and Stowe Township in the greater Pittsburgh area and has a K-12 enrollment of 1,382 students at three schools.

"Although we are a small and compact school district, we still need to keep on top of things," said Chuck Lanna, the district's director of administrative services. "When the district started looking at routing systems, one company immediately jumped to the top of our list: EDULOG. We had heard very good things about their *ePTS* system from a neighboring district, and their solution of combining ASP hosted software with continuing services is definitely the right approach for a small district with contracted busing services. There was really nothing else that compared to the EDULOG for our purposes."

"EDULOG is pleased to add to another school district to our growing list of knowledgeable *ePTS* customers, and we're looking forward to serving the Sto-Rox School District," said EDULOG president Mike Darling. "We're confident that our *ePTS* transportation solution will more than meet the district's current and future requirements. Recent innovations have made the EDULOG system the easiest to use of all the school transportation software products, and when that's combined with our experienced consulting staff and the company's unwavering commitment to service and support, you have a winning formula."

EDULOG offers the only pupil transportation management solution that combines routing and scheduling software with in-depth, continuing consulting and data services and access through the Internet. EDULOG's *ePTS* system is widely regarded as the most intuitive and easy-to-use management tool in the industry. With more than 150 employees, EDULOG represents the largest pool of industry experience and resources available to directly assist school districts with not only the implementation, but also the operation, of a routing system. EDULOG's continuing ASP services place the responsibility on the company, rather than the school district, to perform the various tasks required to maintain any brand of routing software. Clients are assigned an EDULOG site manager who personally assists the district by performing the necessary implementation tasks, assisting the district with on-going work throughout each year of the contract, and ensuring that the school district receives full value from automated routing and scheduling.

**Education Logistics (EDULOG) To Provide Internet-Based Pupil Transportation System and Transportation Optimization Services to the Sto-Rox School District, PA** **June 9, 2010**

*Education Logistics, Inc. (EDULOG) has been recognized as the industry leader in pupil transportation solutions since 1978, with an estimated 150,000+ school buses routed by its clients each day. EDULOG partners with K-12 school districts to provide total transportation management systems including true GIS planning and scheduling software, efficiency and optimization studies, guaranteed cost savings plans, GPS-based routing software, student tracking, driver payroll, vehicle inspection, boundary planning, enrollment projection, field trip management, fleet maintenance, innovative ASP solutions for small districts, and a comprehensive selection of Internet-based products. EDULOG uniquely combines its powerful software with initial and continuing consulting services provided by the industry's largest source of such expertise.
