This is not an advertisement. I am an ordinary Edulog user employed by a school system in Georgia. I have been using Edulog for over a year now and have been to Montana for classes, and Edulog is an extremely powerful software. I am more proficient and an advocate of this software due to the technical support provided by Edulog.

Edulog has excellent tech support personnel – all very personable and knowledgeable – who provide outstanding assistance without ever making me feel incompetent. Each is easy to understand when I e-mail them with a question. Their responses are very straightforward. Written communication appears like a set of simple instructions, instead of a manual. I title and archive all e-mails from Edulog support for use as an easy reference guide. If, by chance, they do not know the answer immediately, they always manage to quickly provide me with a solution.

Increased knowledge and experience improve any operator's capabilities with powerful software and Edulog's technical support team has provided both in spades!

Thank you, Support! Thank you, Edulog!
