ROUTING MANAGEMENT FEATURES: ATHENA RELEASE 1.65

DISPLAY WALK PATH, UNRESTRICTED WALK PATH, AND DRIVE PATH

The new "Path to Location" button in the 1.65 release gives users the ability to calculate and display the shortest walk path, unrestricted walk path (ignores all hazard restrictions in the map), and/or drive path to school along the street network.

ENHANCED OPERATIVE ITINERARY WINDOW

The new enhanced operative itinerary window within the "Transportation Requests & Itinerary" card in Data Managment>Students now allows users to click interactive icons or links and be redirected to that particular record in its corresponding Data Management tab. For example, clicking on the School icon will direct the user to the record of that school in Data Management>Schools, clicking on the Run ID link will direct them to that Run's record in Data Management>Runs, and so on.

LANDMARK STOP EXCLUSIONS AVAILABLE IN FEET

Within Mapping > Landmarks, the user will now be able to set Stop Exclusion distances in feet. In previous versions, only Stop Exclusion distances in meters were available. The unit (meter/feet) is set based on the Tenant Configuration in Landmark Module

		× Cancel Sav
Landmark ID	Name *	
1	Landmark Name	
Type *	Distance	
Stop Exclusion	× - 328.084	Feet

DELETE SHAPE NODES WITH SHIFT + RIGHT CLICK

The 1.65 release will give the user more control in managing their map with the ability to manually remove shape nodes in Geocode Editor. By holding the shift button and right-clicking on your mouse, shape nodes will be deleted, as needed.

UPDATED TOOLTIP FOR DELETE BUTTON

In DM>Stops, the tooltip seen when hovering over the Delete button now provides a more descriptive explanation of why a stop is unable to be deleted and why the Delete button is disabled.

Acti sto ≡	is assigned to a run or a trip.
Stop ID	
01.006	Right Side
Location *	
3041 E LINDEN AVE ,62702	2

ENHANCED WARNING MESSAGES FOR OPT FEATURES

When using the Route Improve, Route Build, Route Belltime, Run Assign, Run Resequence, or Run Vehicle Opt features, enhanced warning messaging included in the 1.65 release will clearly state the issue and identify data causing the potential problem.

One or mo	ore records canno	ot be processed for optimization. Please proceed to
perform a	n optimization wit	h these records omitted or cancel in order to rectify the
ssue(s).		
_		
Туре	Item	Error

LINKED GUIDE

Time and Attendance Features

Athena Time and Attendance allows users to better organize time and attendance needs, including the management of employees, exporting payroll documentation and the creation of various records for employee needs.

Archive Pay Period Definitions

With the 1.65 release, the user will now be able to archive past pay periods. By archiving inactive pay periods, the user will be able to reduce clutter by being given the option to work only with active pay periods, if they wish.

PERFORMANCE IMPROVEMENTS

1.65 will provide enhanced performance within Time & Attendance, allowing users to process more payroll exports in less time.

		Payroll Export Record		1
