Routing Management Features

Routing Management Features

Shifting Bell Times

Athena 1.69 allows users the option to shift bell times and early late windows for a school and have the option for stops times on runs changing based on the new window times. Users can choose one of four options:
1) Leave all stop times on runs at their current times prior to shift processing.
2) Adjust stop times on runs where time at school is outside of the new bell time windows.
3) Adjust all stop times on runs to the new bell time windows.
4) Adjusting stop times and clearing locks to allow for updated changes.

Runs In Play - Bell Times Modal

Within the new release of Athena, Runs will automatically be checked within the Runs In Play card in the Bell Times Modal within Data Management > Runs, and Data Management > Students.

Bell Times Modal > Trips Layer

In the 1.69 release of Athena, users can now see the Display all Runs at current Zoom level and the Display all runs in window tools within the Bell Times Modal in Data Management.

Suggest Deletion > Student Download

This release of Athena includes the option for users to add an "Export Deletion Records" option under the "Functions" tab of the student import.

Student Photos in Reports

The 1.69 release of Athena includes the ability to add student photos to reports such as run and route directions and passenger lists. This makes it easy for drivers to be able to view student photos when driving students.

Mirrored Runs

The new 1.69 release of Athena includes a new function that will automatically select mirrored runs. Users can select any combination of unassigned runs, clicking the "Select Mirrors" button and the system will attempt to select other runs in the context to the user's selected runs by comparing the stops on runs. Runs that have stops with a 75% match between them should be considered mirrored

Standard Report Updates

Within Athena 1.69 reports include many new and exciting features.
1. Users will now be able to schedule exported standard reports for students, runs, routes, and schools.
2. Scheduled reports will now be able to export with custom file names.
3. Users are now able to export standard reports directly to their SFTP, allowing additional district admins, who access the SFTP to view necessary exported reports.
