

# Student Ridership

BETTER COMMUNICATION & TRANSPARENCY

KNOW WHERE AND WHEN  
YOUR STUDENTS  
BOARD AND EXIT THE BUS

## Student Ridership Software

Know if your students are  
boarding the correct school bus  
at the correct stop

Instantly spot difference  
between your transportation  
planning and reality

Accurate data is the key to  
finding future transportation  
savings

# SAFETY IS IN THE CARDS

Integrate your Student Ridership software with RFID technology that sends student IDs from the bus back to dispatch. You will always know when and where students board or exit the bus.

## Edulog Parent Portal App

Edulog's parent mobile applications integrate with Student Ridership to help keep parents informed about their child's status automatically!

## Know All of the Details

Make more accurate planning decisions about the size of the bus you need to send out, whether stops can be consolidated, and even spot ridership trends.

## Special Needs Ridership Made Simple

Special needs transportation requires extra attention to ensure students are getting the services they need. Edulog's detailed analytics and reporting also help simplify Medicaid reimbursement.

## Helping You Make Sense of it All

Rather than making you look through every event, we highlight just the ones that need your attention so you can proactively deal with issues rather than discovering them later.

## Why Edulog Student Ridership?

Student Ridership works with your planned data to offer you real insights into your busing; you'll know when students miss stops, get off at the wrong stops, or even board the wrong buses.
